	Document Title	Application Guide	
	Application Name	Contacts	
	Document Version	1.0	
	Written By	Vlad Feldfix	**Page 1 of 1**

1. **Overview**
   1.1. This program will help you organize your contacts list
   1.2. The user can add, edit, and delete contacts
   1.3. The user can import a txt file into the phone book
2. **How to use**
   2.1. DISPLAY CONTACTS: generate and html contact list to print or save as pdf.
   2.2. NEW CONTACT: insert a new contact
   2.3. EDIT CONTACT: edit an existing contact
   2.4. DELETE CONTACT: delete an existing contact
   2.5. IMPORT CONTACTS: insert a file location to import contacts from. Any text-based file will do: txt, csv. Etc.
   2.6. EDIT DATABASE STRUCTURE: edit the database structure file (see section 4 related files for more details)
3. **Settings**
   3.1. Contacts location > path to the contacts list generated by the app based on the database structure
4. **Related files**
   4.1. database_structure.txt
      4.1.1. The database structure is a list of KEY KEYTYPE elements described as follows:
      4.1.2. The KEY describes the data-field. It can be anything. PHONE, FIRST_NAME, LAST_NAME. any string of symbols **a-z**, **A-Z**, **0-9**, _. no spaces!
      4.1.3. The KEYTYPE can be one of the following: NUMBER, STRING, BOOL. (bool accepts only Y or N)
      4.1.4. Here is an example of a database structure:

```
ID NUMBER
FIRST_NAME STRING
LAST_NAME STRING
PHONE STRING
LOCKER NUMBER
IN_WHATSAPP_GROUP1 BOOL
IN_WHATSAPP_GROUP2 BOOL
```

      4.1.5. The first column (in this case ID) will be required to be unique
5. **Output**
   5.1. contacts.csv according to data structure
6. **Document version history**
   6.1. v1.0 created on 2026-10-29
